

atomic

We make it simple to create software.

Creating software is hard

- Writing code by hand
 - takes a long time
 - is very expensive.
- Low-code & no-code tools
 - Extremely limited use cases
 - Not customizable enough

Atomic makes it simple to create software

1. 90% faster than writing code by hand
2. Covers all use cases
3. Is 100% customizable

What sets Atomic apart?

A proprietary method
of generating code

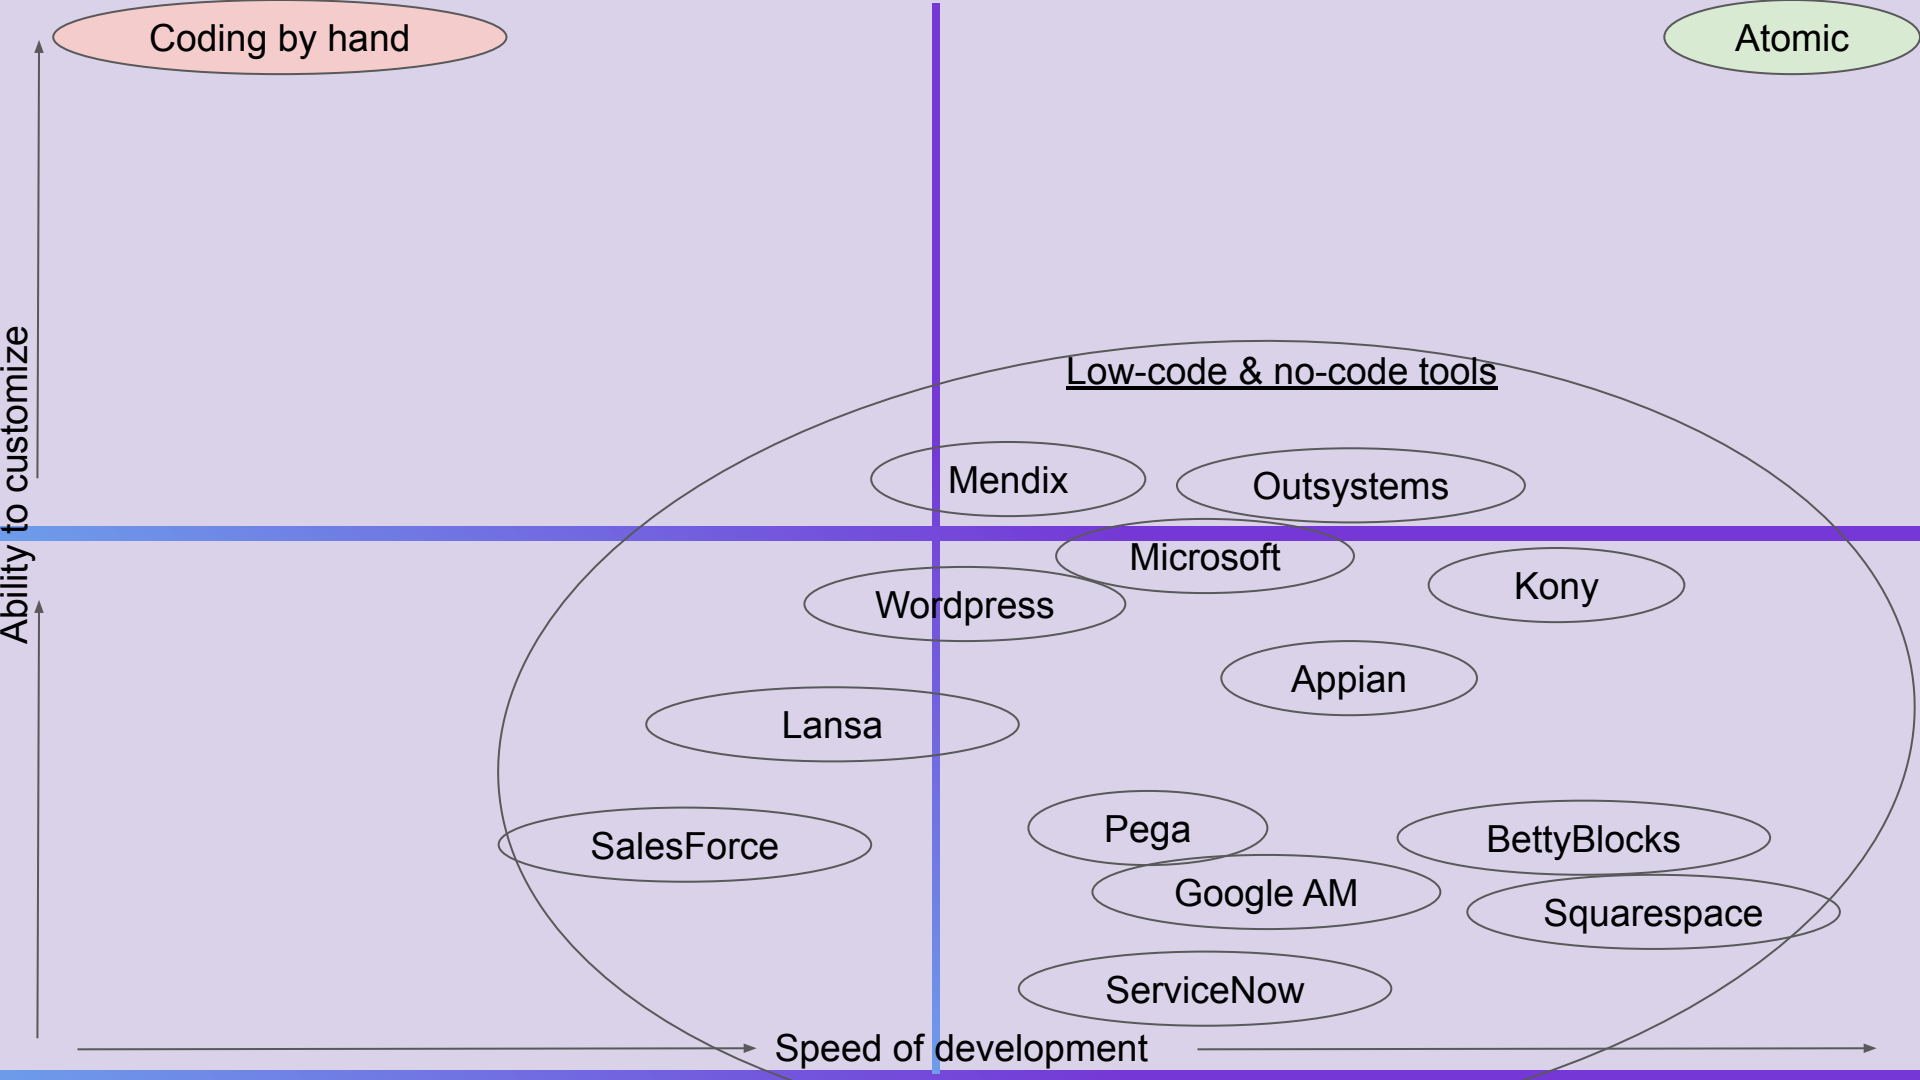

gives us a giant competitive advantage

The product

- A simple UI lets you generate code
- Create code in any major programming language
- All code is 100% editable and customizable

Atomic makes it simple for us all to create software

- ▶ A world-wide market of over **26 million** developers
- ▶ Over **10 million** Web & App designers
- ▶ **10s of millions** of *citizen* developers
*tech-savvy entrepreneurs, business owners, students, analysts

Business Model

- \$400 per month per developer for 1 language
- \$1000 per month per developer all inclusive

- 1st month free to learn platform
- Add-on pricing for plug-play components
 - *Accounting, HR, warehousing, etc

John Hall Founder/CEO

- Co-founder/CTO of Tradesy. Grew team from 2 to 110 FTEs in 18 months.
- 22 year tech startup veteran
- CTO of Heartbeat.com
- Director of Tech at Cars.com

Matt Grubb CTO

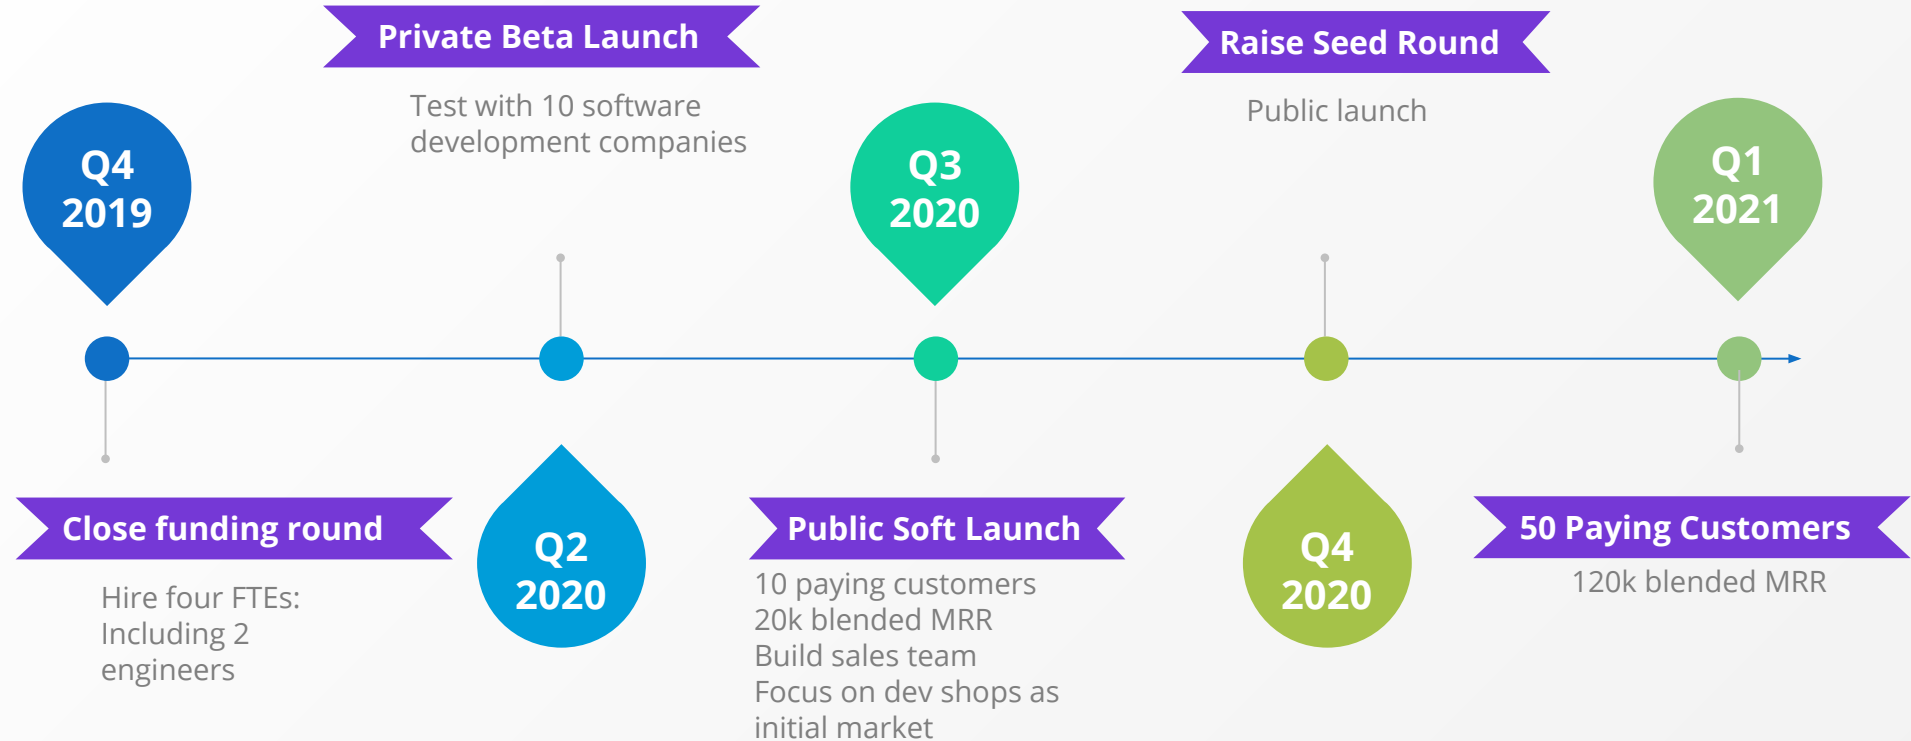

- Founder/CEO of Irate Media
- Lead multiple engineering teams
- Proven systems architect at multiple companies

Brett Hayes Front-end Lead

- Co-founder/CIO of Hedgebase
- Co-founder/CTO of HagggleFree
- 11 year tech startup veteran
- Developer, designer, photographer

Short Term Timeline

15 Month Development Roadmap

Proof of Concept

Nov 2019

V1 Beta: React Native JS

May 2020

V1 Production Release

July 2020

V2 Beta: Java, PHP, Node

Sept 2020

V2 Production Release

Nov 2020

V3 Beta: Python, Non-dev
tools, Swift, GoLang, Ruby

Jan 2021

V3 Production Release

Mar 2021

Our long term vision is a world where only computers write code.

As features & functionality are added to Atomic it will reach a point where non developers will be able to create any kind of app, site, or backend system that they need.

What we need

- 500k
 - This is for engineers, design, testing, and content creators
 - With this money we will hit all of the milestones for our next round within 8 months
 - Thanks
